## Skill 3 Introduction

In the Introduction to your essay, you must tell the reader what you plan to say. You must describe in one or two sentences whether the lecture challenges or supports the reading passage. Look at the sample notes from the topic on solar energy:

Reading	Lecture
Main Ideas	Main Ideas
1. solar energy abundant and cheap	1. expensive to install system
2. doesn't cause pollution	2. can't be used everywhere
3. available everywhere	3. solar panels don't look nice

Look at a sample introduction for this topic:

The reading presents solar energy as a good alternative energy source, but the lecturer points out that solar energy has several disadvantages.

Here are some words that you can use to discuss a challenge or a support of the reading passage.

Useful words	
Challenge	Support
but	agree
challenge	also
contradict	and
disagree	both
however	confirm
on the other hand	likewise
	support

## Practice

Go back to the ideas that you connected in Skill 1. Choose the best introductory sentence for each set of notes.

- 1. Reading 1 and Lecture 1
  - (A) The reading passage discusses the importance of parental involvement in education. The lecturer agrees that parental involvement is important and discusses ways to encourage it.
  - (B) Schools should encourage parental involvement because it leads to higher student achievement.
- 2. Reading 2 and Lecture 2
  - (A) The reading passage explains how aromatherapy has been used like medicine to treat illness and improve mood. The lecturer, however, says that there is no scientific evidence to prove that aromatherapy is effective.
  - (B) The reading passage explains different ways that aromatherapy is used for different types of ailments. There are many people who do not believe in these kinds of treatments.
- 3. Reading 3 and Lecture 3
  - (A) The lecturer explains that forest fires often have natural causes, such as lightning. They are important in maintaining the natural balance of forests.
  - (B) Both the reading passage and the lecturer talk about the causes of forest fires and the different types of forest fires that can occur.
- 4. Reading 4 and Lecture 4
  - (A) Industrial agricultural gets a high yield by using a system of monoculture. Unfortunately, it requires the heavy use of chemicals, and this has led to an environmental disaster.
  - (B) Industrial agriculture relies on a system of monoculture to get high crop yields, which leads to the heavy use of chemicals. Organic farming, on the other hand, works with natural resources and does not require the use of chemicals.
