JOURNAL REVIEW ASSIGNMENT

Hi, everyone! As a well-read consumer of tech-ed journals, you'll be very aware that this list is, at best, quite limited. Feel free to use a journal in which one of our class readings appeared (e.g., Helsper & Eynon, 2010, in the *British Educational Research Journal*) or any other tech-related journal that you find or are familiar with. Please contact me with any questions.

This review consists of the following parts:

1. Bibliographical information about the journal (where accessible, published since when, publisher). An image of the journal cover would also be a nice touch (hint, hint).

2. The journal's mission statement (sure, go ahead and copy-paste this, but adding a comment or two would be appropriate).

3. A summary of the types of articles published in the journal (with commentary, of course).

4. Bibliographical information about at least one article that you think looks interesting; you don't need to actually read this for me or for our class, but you might add it to your many 'free-time' articles that you'll get around to reading in the future.

5. Deadline: June 30 (the same as for the final quiz), but feel free to complete it earlier.

6. Submission: This is to be included in your blog.

Journal list:

System

Language Learning and Technology

Computers & Education

JALT CALL Journal

Journal of Research on Technology in Education
